input.1p

Java

```java
package q35952;

public class TestAddition {

    public int sum(int num1, int num2) {
        return num1 + num2;
    }

    public static void main(String[] args) {
        TestAddition example = new TestAddition();

        int num1 = 5;
        int num2 = 10;

        int result = example.sum(num1, num2);

        System.out.println("Sum: " + result);
    }
}

```
