input.1p

Java

```java

package q10810;

public class GuessHoliday {
    public static void main(String[] args) {
        //write code to convert the value passed
        //in args[0] into a boolean
        boolean isHoliday = Boolean.parseBoolean(args[0]);
        if (isHoliday) {

            System.out.println("I am sleeping!");
        } else {
            System.out.println("I am working hard!");
        }
    }
}
```
